## Objective

Full-Stack Web Development Coding Bootcamp graduate skilled in MERN stack applications. Eager to learn, collaborate, and contribute to a dynamic team while staying current with industry trends.

## Technical Skills

**Frontend**: ReactJS, HTML, CSS, Javascript, Responsive Design, jQuery, Bootstrap, AJAX
**Backend:** MySQL, ORM, MongoDB, Express, Node, Handlebars, GraphQL, Webpack

## Projects

**DEJA Imp** | https://bit.ly/deja-imp-repo | https://bit.ly/deja-imp                              Group Project

- Built front-end react components and back-end scaffolding using MERN stack, mongoose, and faker-js to provide a single-page application for managing inventory and vendors for a local wallpaper business.
- Technologies used: Javascript, Node.js, Express Package, MongoDB, Mongoose ODM, GraphQL, JSON Web Tokens, Dotenv package, Bcrypt Package, Faker-js Package.

**Artist Nation Press List** | https://bit.ly/presslist-repo | https://bit.ly/AN-presslist                    Group Project

- Built RESTful API routes and controllers using Express.js and Sequelize and built the front-end search page using handlebars.js for Artist Nation contractors to organize and manipulate their presslist database internally.
- Technologies used: Javascript, Node.js, MySQL, Express Package, Sequelize Package, Handlebars, Express Sessions, Connect Session Sequelize, Dotenv package, Bcrypt Package, Casual Package.

**LOUD Social** | https://bit.ly/loud-social                              Current  Independent Project

- Developing a single-page social media application using MongoDB, Express, React and Node.js that aims to strengthen communal bond by adding an online platform for the LOUD Community.
- Technologies used: Javascript, Node.js, Express Package, MongoDB, Mongoose ODM, GraphQL, JSON Web Tokens, Dotenv package, Bcrypt Package, Faker-js Package.

**babyGearXchange**                              Current  Group Project

- Created a beta sign-up website, using HTML, CSS, Javascript on the front end, and Node.js, Express, and Google Sheets API for the backend, for a babygear marketplace mobile application.
- Technologies used: Javascript, Node.js, Express Package, Google Sheets API.

## Work Experience

**EdX** | Full-Stack Web Development Central Grader                              Los Angeles, CA | 2023 - Present
- Provide timely and detailed grading feedback to students enrolled in University Bootcamps across the globe in the area of Full-Stack Web Development.
- Maintain a high standard of quality and consistency in grading to support student learning outcomes.
- Keep up-to-date with industry trends and best practices in Full-Stack Web Development to provide relevant and valuable feedback to students.

## Education

**Full-Stack Coding Bootcamp Certificate** | UCLA Extensions, Los Angeles, CA                    August 2022
**BS, Business:  Integrated Marketing and Comm** | San Diego State University, San Diego, CA          June 2011
